Company Services :

PROJECT MANAGEMENT

Juventum's consultants offer 15+ years of experience delivering large projects to leading blue-chip organisations on time and within budget in the financial services and telecoms sectors.   Juventum's consultants are goal-driven with a verifiable track record turning around time-constrained projects. Juventum offers a significant track record within the content and process management sector with 20+ years hands-on experience of IBM FileNet product suite.

Capabilities include:

- Project Planning & Delivery
- Project Managers with Technical Background
- Requirements Analysis & Design
- Process and Quality Management
- 20+ years' Experience with IBM FileNet Product Set
- Extensive familiarity working with offshore development teams
- Account Management & Client Relations

PRODUCT DEVELOPMENT

The company's consultants successfully designed and implemented an Oracle-based content and process management product for a third party client.   Designed to facilitate rapid implementation the product is principally targeted at low-cost departmental solutions and saw rapid take-up in the life and pensions sector.   The lead consultants' wealth of experience working within the ECM sector facilitated prompt delivery within time and budget.

Product Experience :

IBM FileNet P8   - since 2004, to v5.2

Highly experienced working with the full P8 product set, including:
